

Specialty Medication Analyses

Analyze & Validate All Elements of Medical & Pharmacy Spend and Actions for Outlier Providers

We analyze pharmacy and medical encounter claims identifying outliers and testing for cost, diagnosis, dose, utilization and clinical reviews. Outcomes of these analyses are improvements in transactional issues and targeting outlier providers to prevent further problems. Our findings indicate that at least 42% - 44% of Specialty Medication claims require improvements.

Analyses Include:

- *Comparison of Pricing*
- *Analysis of Duplicate Payments*
- *Audits of Specialty Claims*
- *Analysis of Channel Discounts*

Outcomes Include:

- *Medications Paid at More Favorable Rates*
- *Identification of Clinical Problems for Targeting Improvement*
- *Identification of Claims Paid for Unapproved Uses*
